

Field Report

Program Resources (GIK) - World Vision Canada(WVCAN)

Instructions: Every shipment of Clean Birthing Kits must have this Report completed. It is important for WVCAN to comply with our audit requirements and also so WVCAN can report back to donors.

Please complete, sign and return the form to the WVCAN Program Resources Team within 60 days of resource distribution.

Who fills the Report out? This form is sent to *each AP and/or Project Manager who received Birthing kits* from this shipment, so they can complete it and send it back to the NO GIK Coordinator.

PART 1: Allocation of Birthing Kits to Projects - Should be completed by the Health Technical Team and/or Program managers.

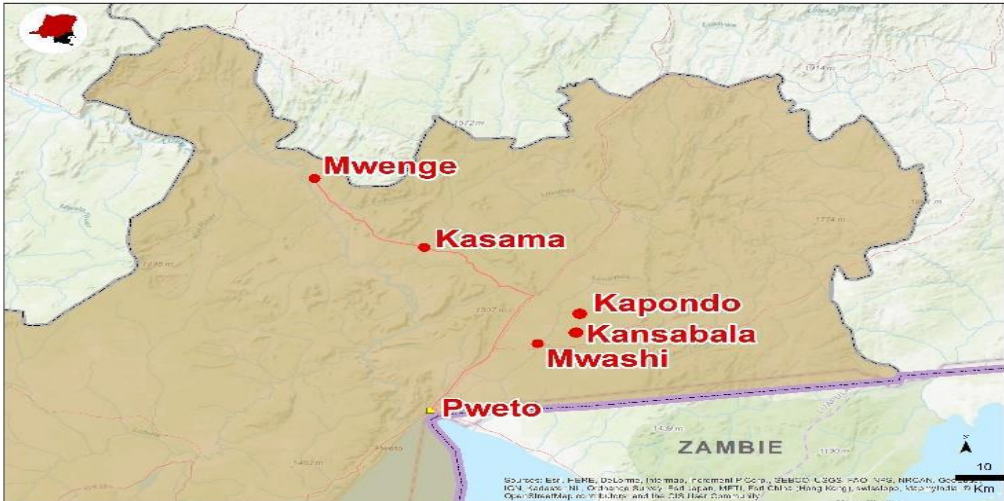

PART 2: Project Distribution - Should be sent to every project or program receiving Clean Birthing Kits, to complete the distribution details.

The NO GIK Coordinator then only needs to combine all the responses into one document, sign it off and send it back to the WVCAN Program Resources Team.

Recipient National Office (NO)	<i>World Vision South Zone</i>
WVCAN Shipment Number	GIK 2016-20
Number of Clean Birthing Kits	<i>8272 kits</i>

Please complete this report 2 months (60 days) after birthing kits reach their destination.

PART I - ALLOCATION OF CLEAN BIRTHING KITS Completed by Program/Project/ADP Manager & Health Technical Lead

Number of kits	Name & Location of, ADP or Project who received birthing kits	Project Overview and Integration of kits <ul style="list-style-type: none"> - Name of MNCH project - How are the kits integrated into and strengthening WV MNCH programming? - Which log frame outputs and outcomes are the birthing kits contributing to? 	Contextual Factors <p>Tell us a bit about the ADP/Project and challenges faced in this location.</p> <p>Other comments.</p>
1375	Mwenge Health Center,	<ul style="list-style-type: none"> - Katanga Food Distribution in Pweto district - The Kits were distributed to the Health Center of Mwenge who is located at 175 Km at the North Est side of Pweto, to strengthening and support the Health Centre who have been mostly overwhelmed due to the arrival of the IDPs coming from Tanganyika, running the confrontations between the pygmies and Luba tribe.  <p><i>This map shows the recent conflict which occurred since February 2017</i></p>	<p>The situation seems to be deteriorating in the Pweto Territory, particularly on Mutabi axes - Dubie - Kapangwe - Kato and Mutabi - Kasongo Kamulumbi - Kabangu - Dikulushi that are affected, since February 2017 a Community conflict between Bazela I and Twa. Turnings that takes the conflict concerned. On site, the coexistence of these communities is far from improving. Between February and July 2017, seven clashes were reported between the two peoples in several villages spread over the aforementioned axes. These incidents have caused movement of people to destinations within the territory of Pweto and to that of Mitwaba to it neighbor. 10,211 displaced people between May and July 2017, from Tanganyika are at Kansabala, Kapondo, Kasama Mwashhi and Mwenge. •</p> <p>Community conflict Bazela Twa and tends to intensify in Pweto. Currently, two of the three chiefdoms Pweto account are affected by this community conflict, namely Kyona Nzini and Mwenge. This antagonism is in addition to another humanitarian crisis affecting, since December 2016, the Territory of Pweto, with the influx of displaced from the Kalemie territories, Manono and Moba Nyunzu. These people fled fighting between Luba and Twa. The displaced say that following these events, there have been abuses such as looting of property, killings, theft of property and fire houses, committed by both militias.</p>
1100	Kabanza Health Center	Same in the Pweto territoy	

825	Mucima Health Center	<p>Birthing kits are used have been used mostly to attract the mothers to attend the clinics and get the check-ups. Mostly mothers who have been displaced, lacking even the basic resources for the babies, have seen themselves blessed by these donation</p> <p>The kits have given value to the following outputs:</p> <ul style="list-style-type: none"> - Birthing case have been increased and gave value at the clinics, decreased case of neonatal infection and less maternal mortality - Health Workers have also seen working efficiently due to the presence of equipment which make them as well very safe by using the adequate and quality equipment while attending the mothers for birthing.
1100	Kasama Health Center	
1925	Pweto Health Zone	
1947	Kalemie Health Zone	

PART 2 – PROJECT or PROGRAM DISTRIBUTION DETIALS (from Distribution Report) – Project or program manager to complete

Name of Location	Name of Clinic/ Health Centre	# of Kits given to Clinic or Health Centre	1. Number of Birthing Kits given to mothers 2. Number of births using a Birthing Kit 3. Total number of health facility births with or without a birthing kit (and home births if recorded)	Method of Distribution Clinic, Community Health Worker, VHT's or Other?
Mwenge Health Center	Mwenge Health Center	1375 Kits	<i>All the kits were to use when the mother give birth. The Health Centre personnel in charge, says that we have attendance increased since the IDPs are still coming. The rate of births were 30-70 a month and due to the fact that it's the resources very rare used, they would like to keep all the kits for their Centre.</i>	<i>Kit are stored at the clinic in order to discourage the home births and minimize the birth at risk.</i>
Kabanza Health Center	Kabanza Health Center	1100 kits	<i>All the kits were to use when the mother give birth. The rate was 20-40 per month</i>	<i>Kit are stored at the clinic in order to discourage the home births and minimize the birth at risk</i>

<i>Kasanda Health Center</i>	<i>Kasanda Health Center</i>	<i>1100 Kits</i>	<i>Resources to be used at the Health Center when mothers have gone through all antenatal visits</i>	<i>Kits stored at the Center, in order to make sure that all items are kept safe and also for sensitive purpose</i>
<i>Pweto Health Zone</i>	<i>Pweto Maternity</i>	<i>1925 Kits</i>	<i>1000 Kits were to be used at the Pweto Maternity and 925 Kits were to be sent in the other centres in Kapondo and Kansabala health centres where there are others IDPs sites. We visited just the Pweto Maternity, where the questions came from the nurse and two mothers: The soap is too small can they send a bigger one than this please. The soap have a good smell but very bitter, can it be used as well for the baby or just for the nurse and mother for cleanness and sanitation purpose? Is that possible to have more gloves? In May 2017 while we were visiting Pweto hospital the stock was at 1/4 remaining.</i>	<i>Kits stored at the Center, in order to make sure that all items are kept safe and also for sensitive purpose</i>
<i>Kalemie Health Zone</i>	<i>Kalemie Health Zone</i>	<i>1947 kits</i>	<i>The Health Zone was to distribute to health center, not got any feedback as it was distributed a month ago in Kalemie. Once got feedback we will share with you</i>	<i>Kits stored at the Center, in order to make sure that all items are kept safe and also for sensitive purpose</i>

Total amount of Kits distributed (60 days after receipt):	8272 kits
Total Amount of kits in storage (60 days after receipt):	8272 kits
Name and Email of person completing report	Kimonge_Jonathan@wvi.org

Birthing Kits being given to the Health Zone in Kalemie by Dr Lebon

Pweto General Hospital where the Birthing Kits were handled in January 31st 2017

Madame Sylvie Nkulu, 27 years old have just gave birth to the baby boy child an hour before our arrival. The baby not yet named, waiting for the father. Maman seraphim the nursery, have congratulate World vision for making their lives and work very easy by providing the genuine and useful material in their maternity.

The baby Joseph Kasongo, born yesterday before our arrival in the maternity of Pweto, The mother Justine 24 years was being treated in the surgery room.

Amazing joyful heart of the lady Kabemba mwangala 23 years Old, Gave birth yesterday of our arrival. Lacking all the necessary for a woman who expecting a baby, as you can noticed, nothing to wrap her daughter Juliette Kabembo, but said I'm very happy to find that the Hospital is able to decrease the birth expenses due to the donation from WV (almost \$2,4) and what made her happiest is that the soap smells is good and the plastic sheet she will be able to re-use when back home in order to lay her daughter
